About Me

Highly motivated and results-driven **Mobile & Web Developer** with a proven track record of success in delivering innovative, efficient and effective user experiences. I am well-versed in JavaScript, ReactJs & NextJs and familiar with Redux, Redux Toolkit, React Query, Redux-Saga, and other relevant tools and technologies. I am also experienced with gestures & animations. My ability to effectively communicate technical concepts to both technical and non-technical stakeholders has been a key factor in my success. My passion for staying up-to-date with the latest technologies ensures that I can always bring new ideas and solutions to the table.

Skills

Javascript, Typescript, React Native, React.js, Next.js, Reanimated, React Query, Redux, Redux Saga, Redux Toolkit, Firebase, HTML, CSS(SASS), Styled Component, Styled System, Jest, Adobe Illustrator

Experience

Mobile App Developer   Jan 2023 – June 2023
Zdaly | Remote

- Contributed to the design, architecture, development, and publishing of two React Native projects (PriceEasy & BP Site Optimiser).
- Implemented a mapping solution for the applications which provides information on the nearest fuel competitors based on the user's currently selected station.
- Streamlined the onboarding process of the users by using dynamic links (sent via SMS). App-specific deep links were used for the implementation.
- Implemented a survey system in which a survey can be done using dynamic links sent via SMS.
- Integrated Fastlane to automate development and release workflow.
- Involved in the code reviews of React Native Developers across two products.

Software Engineer   Mar 2021 – Dec 2022
BigBinary | Remote

- Collaborated on a React Native Template. It helped save project setup time, bringing it anywhere from 4 to 8 hours to just one command.
- Collaborated on React Native training guide & best practice articles that helped save hours of code review time.
- Involved in the training, onboarding & code reviews of React Native interns.
- Integrated Fastlane to automate development and release workflow for several applications.
- Implemented a Rich Text Editor for mobile applications.
- Collaborated on React Native Component library to save development time and to make UI consistent across applications.
- Contributed to the design, architecture, development, and publishing of several React/React Native projects.

Software Developer   Jun 2020 – Feb 2021
Appeneure Technologies | Remote

- Worked on various projects on React, React Native and Firebase.
- Worked on implementing a live tracking feature with Google Maps for tracking delivery vehicles.
- Redesigned the entire mobile app UI (JsTips & CryptoCurrency) resulting in around a 20% increase in average app rating and over 90% reduction in inconsistency issues reported by the users.

UI Developer   Dec 2019 – Jun 2020
Western International Group | Remote

- Solely worked on implementing the complete front end of an e-commerce website (wigme.com) and an admin tool (omnycomm.com) to change every aspect of the website (e.g.: fonts, theme, banners, etc.)
- Involved in the requirement gathering phase with the business users and dealing with UX single-handedly to continuously accommodate changing user requirements.
- Translated team's UX requirements into responsive, interactive features, using HTML/CSS/Sass/React and Redux.
- Implemented Initial setup and component migration to Redux for the product.
- Created a drag & drop tool with Canvas for the purchasing team to create flyers which resulted in reducing the time to create flyers to 20 minutes from 4 hours.
